<sup>1</sup> The figure(s) includes domain names in the .tk ccTLD. .tk is a free ccTLD that provides free domain names to individuals and businesses. Revenue is generated by monetizing expired domain names. Domain names no longer in use by the registrant or expired are taken back by the registry and the residual traffic is sold to advertising networks. As such, there are no deleted .tk domain names. <https://www.businesswire.com/news/home/20131216006048/en/Freedom-Closes-3M-Series-Funding#.UxeUGNJDv9s>.

<sup>2</sup> The generic top-level domain and ccTLD data cited in the brief: (i) includes ccTLD Internationalized Domain Names (IDNs), (ii) is an estimate as of the time the brief was developed and (iii) is subject to change as more complete data is received. Some numbers in the brief may reflect standard rounding.

<sup>3</sup> The domain name base is the active zone plus the number of domain names that are registered but not configured for use in the respective TLD zone file plus the number of domain names that are in a client or server hold status. The .com and .net domain name registration figures are as reported in Verisign's most recent SEC filings.
