<sup>1</sup> All figure(s) exclude domain names in the .tk, .cf, .ga, .gq and .ml ccTLDs. Quarterly and year-over-year trends have been calculated relative to historical figures that have also been adjusted to exclude these five ccTLDs. For further information, please see the Editor's Note contained in [Vol. 19, Issue 1 of The Domain Name Industry Brief](#).

<sup>2</sup>The generic TLD, ngTLD and ccTLD data cited in the brief: (i) includes ccTLD internationalized domain names, (ii) is an estimate as of the time the brief was developed and (iii) is subject to change as more complete data is received. Some numbers in the brief may reflect standard rounding.

<sup>3</sup> The domain name base is the active zone plus the number of domain names that are registered but not configured for use in the respective TLD zone file plus the number of domain names that are in a client or server hold status. The .com and .net domain name registration figures are as reported in Verisign's most recent SEC filings.
