

Verisign Statement Regarding ICANN's Decision on .Web

May 3, 2023

RESTON, Va.--(BUSINESS WIRE)--May 3, 2023-- VeriSign, Inc. (NASDAQ: VRSN), a global provider of domain name registry services and internet infrastructure, today issued the following statement regarding the ICANN Board of Directors decision on the .web auction:

We are pleased that the ICANN Board of Directors completed its review of the Independent Review Process Panel's Final Declaration and concluded that Verisign's participation with Nu Dot Co LLC (NDC) in the 2016 .web auction was appropriate and within ICANN's policies and guidelines, and that ICANN should proceed in processing NDC's application for .web. We now look forward to NDC's execution of the .web Registry Agreement and submission to ICANN of the request for assignment of the .web Registry Agreement to Verisign.

As the most experienced and reliable registry operator, Verisign is uniquely positioned to widely distribute .web domain names, while operating the .web registry at the highest level of security, stability, and resiliency. Our track record of more than a quarter century of uninterrupted DNS availability for .com and .net reflects our commitment to the businesses and individuals who will use and depend on .web domain names.

We look forward to working with ICANN and NDC to finalize the disposition of .web, and to sharing our plans for launching and growing this exciting new top-level domain.

As we stated during our earnings call on April 27, our 2023 financial guidance does not currently reflect the potential launch of .web. Any changes to our guidance will be publicly disclosed by the Company.

About Verisign

Verisign, a global provider of domain name registry services and internet infrastructure, enables internet navigation for many of the world's most recognized domain names. Verisign enables the security, stability, and resiliency of key internet infrastructure and services, including providing root zone maintainer services, operating two of the 13 global internet root servers, and providing registration services and authoritative resolution for the .com and .net top-level domains, which support the majority of global e-commerce.
