Q&A Appendix

Non-GAAP Financial Measures

Verisign provides quarterly and annual financial statements that are prepared in accordance with generally accepted accounting principles (GAAP). Along with this information, management typically discloses and discusses certain non-GAAP financial measures on investor conference calls and related events. The non-GAAP financial measures included in this presentation are Adjusted EBITDA and Free cash flow.

Adjusted EBITDA is a non-GAAP financial measure and is calculated in accordance with the terms of the indentures governing Verisign's 2025 and 2027 senior notes. Adjusted EBITDA refers to net income before interest, taxes, depreciation and amortization, stockbased compensation, and loss on debt extinguishment.

Free cash flow is a non-GAAP financial measure defined as cash flow from operating activities, less capital expenditures.

Management believes that these non-GAAP financial measures supplement the GAAP financial measures by providing investors with additional information that allows them to have a clearer picture of Verisign's operations and financial performance and the comparability of Verisign's operating results from period to period. The presentation of these non-GAAP financial measures is not meant to be considered in isolation nor as a substitute for financial measures prepared in accordance with GAAP.

The tables herein include a reconciliation of the non-GAAP financial measures to the comparable financial measures reported in accordance with GAAP for the given periods.
