Q&A Appendix

Non-GAAP Financial Measures

Verisign provides quarterly and annual financial statements that are prepared in accordance with generally accepted accounting principles (GAAP). Along with this information, management typically discloses and discusses certain non-GAAP financial measures in quarterly earnings news releases, on investor conference calls and during investor conferences and related events. These non-GAAP financial measures do not include the following items that are included in the comparable GAAP financial measures: stock-based compensation, non-cash interest expense through June 30, 2018, and loss on debt extinguishment. Non-GAAP net income is adjusted for an income tax rate of 22 percent which differs from the GAAP income tax rate.

Management believes that these non-GAAP financial measures supplement the GAAP financial measures by providing investors with additional information that allows them to have a clearer picture of Verisign's operations and financial performance and the comparability of Verisign's operating results from period to period. The presentation of these non-GAAP financial measures is not meant to be considered in isolation nor as a substitute for financial measures prepared in accordance with GAAP.

The tables herein include a reconciliation of the non-GAAP financial measures to the comparable financial measures reported in accordance with GAAP for the given periods.
